Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16, and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claims 8 and 16, there is no antecedent basis for "said housing".
- Claims 1, and 8 are confusing because it is not clear how the housing have the deflector plate at the "distal-most end" when it is the deflector assembly that actually contains the plate.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3, 4, 6-9, 11, 12, 14-16, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Capozzi et al (US 5,116,315).

Art Unit: 3763

Capozzi discloses a syringe system having a housing 14, a discharge nozzle 58 housing a plurality of conduits having exit openings, and a deflector assembly 20 having a deflector plate 77 positioned at a distal-most end of the housing.

5. Claims 1, 5-9, and 13-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Redl (US 6,620,125).

Redl discloses a fluid delivery system having a housing 1, a discharge nozzle 9 housing a plurality of conduits having exit openings, and a deflector assembly having a deflector plate 14 positioned at a distal-most end of the housing.

Allowable Subject Matter

6. Claims 2 and 10 are would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the art of record does not teach or render obvious a fluid delivery system having a plurality of reservoirs including a sealable opening configured for being penetrated by a proximal end of a respective one of the plurality of conduits, in combination with the elements set forth in the claims.

Response to Arguments

8. Applicant's arguments filed April 5, 2004 have been fully considered but they are not persuasive.

The claims do not distinguish applicant's invention from the references.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Roby et al.
10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
